

Five points to remember when specifying DuPont™ Corian®:

1. Specify product manufacturer: Corian® is made only by DuPont.
2. Specify nominal thickness: 12mm for horizontal or vertical applications and 6mm for vertical applications.
3. Specify exact colour(s) by name. Please visit our website at www.corian.com.au for colours and various sink models.
4. Specify fabrication and installation: to ensure that the fabrication and installation of your job meet the requirements for the DuPont™ 10-Year limited installed warranty, specify that the work must be carried out by a DuPont™ Certified fabricator installer.
5. Please add our details to the finishing schedule and send us a copy, and we will reserve the stock for your project;

DuPont™ Corian®

Making specifying easier

DuPont™ Corian® is....

SEAMLESS

DuPont™ Corian® can be joined together seamlessly to create a one piece homogenous look, giving virtually unlimited design possibilities as a decorative surface.

HYGIENIC

DuPont™ Corian® is a non-porous material. It is solid through it's entire thickness and can be fabricated with inconspicuous seams, rendering it's surface hygienic. DuPont™ Corian® surfaces do not support the growth of bacteria or fungi.

REPAIRABLE

Surfaces in DuPont™ Corian® are renewable, meaning they can be fully restored to their original condition. Damage caused by abuse can usually be repaired on site by a DuPont™ Certified Fabricator, without having to completely replace the material.

THERMOFORMABLE

DuPont™ Corian® can be thermoformed in wooden or metal moulds at controlled temperatures in order to create various 2D and 3D design objects. Embossing effects can also be created using the Bas Relief technique.

TRANSLUCENT

The translucency of DuPont™ Corian® is especially striking in the lighter colours as well as thinner sheets. Many designers are now using the material to create lamps or lighting effects in various applications. The new colour family called the Illumination Series, features enhanced translucency to be used for creating special lighting effects.

SUSTAINABLE DESIGN

DuPont™ Corian® is manufactured in compliance with strict standards in order to limit waste and energy consumption at all stages of the production process. Both the material itself and the joining adhesive are GREEN GUARD Indoor Air Quality Certified® as producing low VOC emissions. DuPont™ Corian® can also help commercial building projects obtain credit points toward achieving their desired Green Star rating.

CORIAN® IN AUSTRALIA

CASF is the national supplier of DuPont™ Corian®. CASF have a dedicated team of professional staff located across Australia, who can help you with any enquiry in relation to Corian®. Feel free to contact our customer support team by telephone on 1300 795 044.
